EXPERIENCE

5Días

Apr. 2025 – Present

Junior Python Developer

- Using Python I automated the generation and upload of financial reports to a news site, significantly reducing manual effort and ensuring timely publication.
- Designed and implemented Python scripts to insert and extract data from both MySQL and MongoDB databases, supporting automated reporting and data analysis pipelines.
- Generated graphs and comprehensive PDF reports detailing key financial metrics for banks in Mexico and Paraguay, providing valuable insights for news articles.
- Configured and customized Zoho CRM using Deluge scripting to automate business processes and streamline client management workflows.

Propio Language Services

Sep. 2023 – Aug. 2025

Interpreter

Remote, PY

- Interpreted financial, legal, and medical calls, achieved and maintained a **97.56%** satisfaction rate with clients.
- Thrived in a fast-paced environment, providing excellent customer service.
 - Increased productivity and streamlined call processes, improving call efficiency by a ~8% margin.

EDUCATION

Universidad Americana

2024 - Present

Undergrad in Computer Engineering,

Asunción, PY

- Applied advanced programming concepts in languages like Python to solve complex problems and build efficient software solutions. Gained practical experience with operating systems and their core functions.
- Built foundational knowledge in database design and management, including schema normalization and SQL querying.
